---

North Lamar ISD Middle/High School is now offering Pathways in Technology Early College High School located at North Lamar Middle/High School through a partnership with Paris Regional Health in Paris, TX. The partnership allows North Lamar ISD to offer P-TECH students an opportunity to complete a high school diploma and a Level 1 Nursing Certification upon completion of the program.

As part of our goal to ensure continued commitment to innovation and growth for the P-TECH program, we offer the following strategic priorities:

**Empowering Engagement**

- Arrange events for the community to share students' artifacts and grow community involvement.
- Work together with local businesses and organizations to address community needs and offer valuable opportunities.

**Expanding Knowledge**

- Apply project-based learning methodologies to train critical thinking, problem-solving, and collaboration skills.
- Perform an extensive review of the current curriculum to ensure it aligns with industry trends and demands.

**Improving futures**

- Apply a thorough support system for students, including academic counseling, mental health services, and career guidance.
- Establish workshops and training sessions to strengthen students' soft skills, such as self-motivation, problem solving and communication.
